

# MISSION SUCCESS STORY

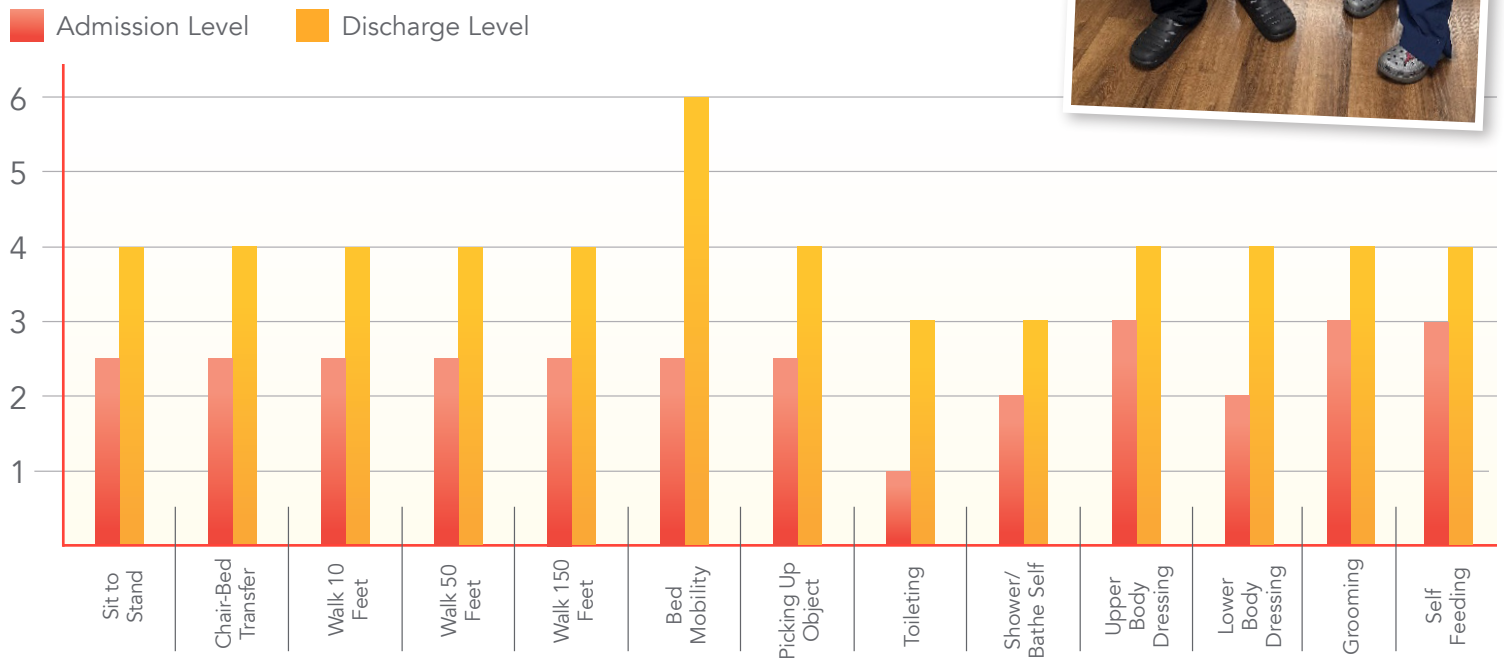

**Joseph R.** was admitted to Mission Nursing and Rehab in July 2023 after a hospital stay for hematuria, UTI, and sepsis. Our therapy team noted impairments in his strength, activity tolerance, dynamic sitting balance, dynamic standing balance, coordination, FM/GM skills, muscle recruitment, stability and endurance affecting ADLs, bed mobility, transfer, ambulation, memory skills, problem solving, word finding/reasoning skills, and safety awareness.

Our experienced team created individualized plans of care for Joseph that focused on treating his impairments. After 20 days of skilled rehabilitation, he demonstrated significant improvement with functional mobility, bed mobility, transfers, ambulation, and activities of daily living. With the help of our rehab team, he was able to reach his goals and successfully return home! **Great job, Joseph!**

## Joseph's Therapy Outcomes

**MISSION**  
NURSING AND REHABILITATION CENTER

**1013 S. BRYAN ROAD, MISSION, TX 78572**
