

MISSION NURSING AND REHABILITATION CENTER SUCCESS STORY

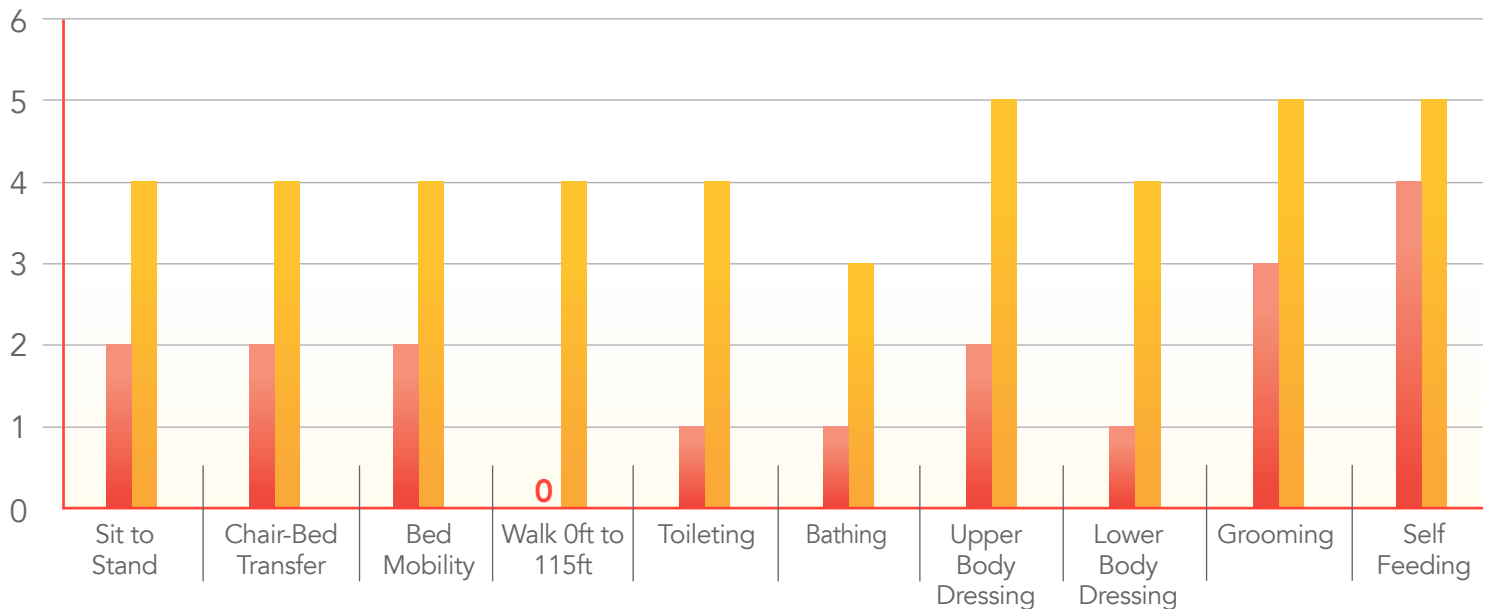

Ernestina P. was admitted to Mission Nursing and Rehabilitation Center in June 2024 following a hospitalization for UTI and hypertension. After an evaluation by our therapy team, she had impairments in BLE strength and balance impeding bed mobility, transfers and ambulation. She also had multiple deficits including coordination, static/dynamic standing balance, fine motor skills, activity tolerance and strength hindering her performance with functional transfers and ADLs.

Our experienced therapy team created individualized plans of care that focused on treating Ernestina's specific impairments. After 14 days of skilled rehabilitation, she demonstrated significant improvement in strength, coordination, balance, activity tolerance, and safety awareness. She was able to reach her therapy goals and successfully return home. **Great Job Ernestina!**
