

# MISSION NURSING AND REHABILITATION CENTER SUCCESS STORY

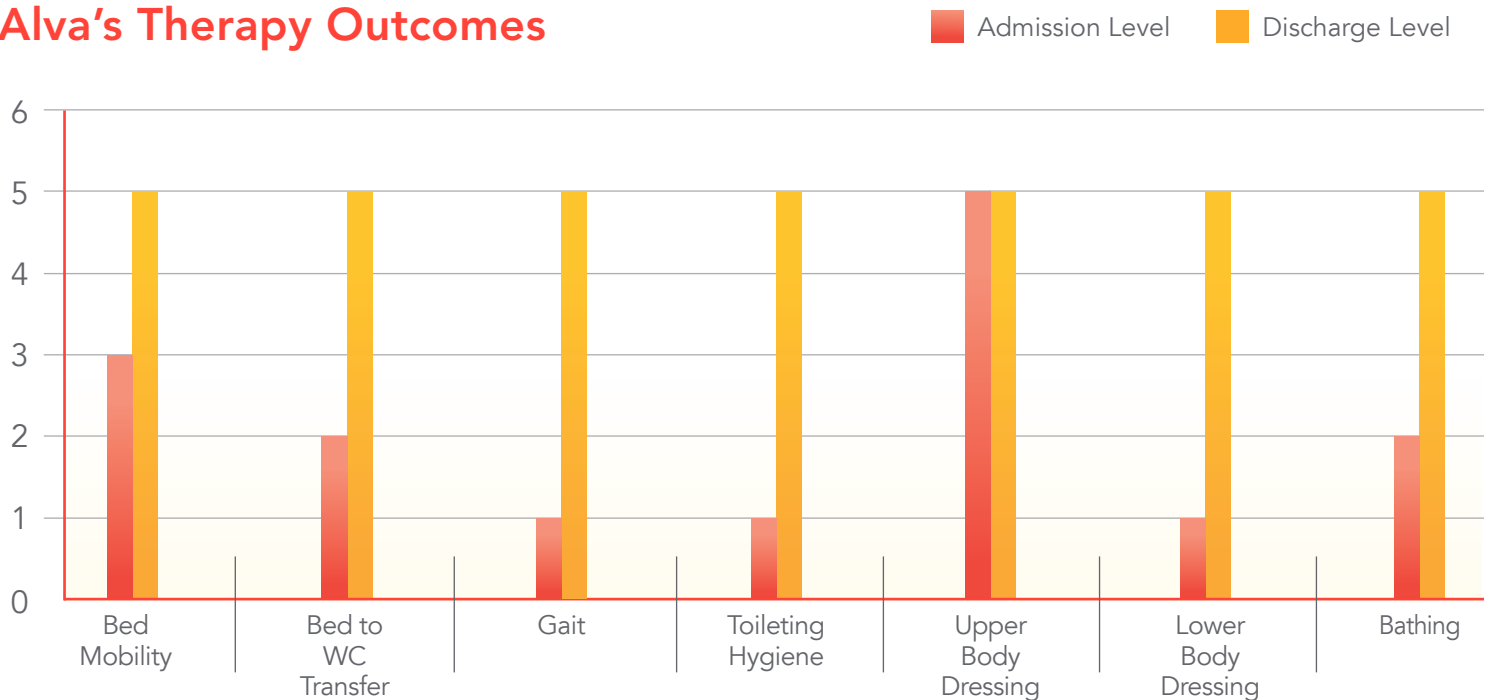

**Alva R.** was admitted to Mission Nursing and Rehab on January 12, 2026, for physical and occupational therapy following a recent fall that resulted in a right distal femur fracture. She experienced a decline in activities of daily living and functional mobility.

Upon evaluation, Alva demonstrated decreased bilateral lower extremity strength, activity tolerance, and balance, which impacted her bed mobility, transfers, and ability to ambulate. She required moderate assistance with bed mobility and maximum assistance with transfers. At the time of her evaluation, she was unable to ambulate. Her occupational therapy assessment indicated she required set up assistance with grooming and hygiene, maximum assistance with bathing and transfers, total assistance with toileting and lower body dressing, and supervision with upper body dressing.

During her stay, Alva worked closely with our skilled therapy team and made steady progress toward her goals. Her strength and determination were evident throughout her recovery. **We thank Alva for trusting the rehab team at Mission Nursing and Rehab, and we are proud of the effort she put forth during her time with us.**

## Alva's Therapy Outcomes

NURSING AND REHABILITATION CENTER

1013 S. BRYAN ROAD, MISSION, TX 78572
